Pertama install expo menggunakan syntax ***npm install -g expo-cli*** , sampai sukses seperti gambar diatas

A screenshot of a Windows Command Prompt window titled "C:\WINDOWS\system32\cmd.exe". The user has entered the command `npx react-native init MyFirstProjectReact` at the C:\PemrogramanBergerak_2023> prompt. The terminal output shows a large ASCII art logo for React Native, which includes the word "react" in lowercase and "native" in uppercase, with dots forming the letters. Below the logo, it says "Welcome to React Native!" and "Learn once, write anywhere.". At the bottom, two green checkmarks indicate the progress: "✓ Downloading template" and "✓ Copying template". The taskbar at the bottom shows various application icons, system status indicators like temperature (28°C) and time (12:21), and the date (13/03/2023).

Pertama buatlah file dengan nama MyFirstProjectReact dengan masukan syntax ***npx react-native init MyFirstProjectReact*** , dan tunggu sampai pembuatan atau download selesai

Gambar diatas menunjukan download dan pembuatan file telah selesai dan sukses.

```
C:\WINDOWS\system32\cmd. X + v

• Have an Android emulator running (quickest way to get started), or a device connected.
• cd "C:\PemrogramanBergerak_2023\MyFirstProjectReact" && npx react-native run-android

Run instructions for Windows:
• See https://aka.ms/ReactNativeGuideWindows for the latest up-to-date instructions.
